Proposal — Vedic Astrology & Occult Sciences AI Consultant Platform

Production-grade **Progressive Web App** · real-time predictive engine on open-source Vedic APIs · live consultant marketplace & per-minute bookings · design, build, host and growth under a single engagement.

PREPARED FOR

Shri Pankaj Sharma Ji
Client & Project Owner

PREPARED BY

Kalki Intelligence
52, Swastik Nagar, MOG Lines, Indore (MP), India
ceo@kalki-intelligence.in · kalki-intelligence.in

1 · EXECUTIVE SUMMARY

You will operate a **two-sided astrology platform**: users receive accurate, real-time Vedic and occult predictions driven by open-source astrological APIs (Swiss Ephemeris / ephemeris, Ashtakavarga, Dasha and Gochara engines); verified consultants sell their expertise through their own profiles, **live per-minute chat, voice and scheduled bookings**, with payments settled through Razorpay.

Kalki Intelligence delivers the complete scope — architecture, PWA build, consultant marketplace, payments, hosting, security and ongoing growth marketing — for a **flat ₹40,000 per month plus 10% of platform revenue**. No licence fees, no paid-infrastructure markup, no separate agency billing. **Target live launch: 15–20 December 2026.**

2 · SCOPE OF WORK

USER PRODUCT

- Installable PWA — works as app and as website from one codebase (no separate app/web build, no store-commission overhead).
- Kundali, Rashi, Nakshatra, Dasha, Gochar, Ashtakavarga, numerology and Vastu modules from open-source astrology APIs.
- **Siddhi AI astrology concierge** — Hindi, English and regional-language answers on birth-chart logic, with citations back to your live data.
- Report downloads (PDF), horoscope schedule, wallet, referral rewards.

CONSULTANT CONSOLE

- Self-service expert profiles, credentials and KYC, pricing per minute, availability calendar.
- Real-time per-minute chat and call sessions with automatic metering, idle guard and fair mid-session cut-off.
- Bookings, queue, ratings, earnings dashboard and weekly settlement via Razorpay payouts.
- Admin panel: verification, commission, disputes, content and fraud controls.

3 · TECHNOLOGY & ZERO-COST INFRASTRUCTURE POLICY

Core Next.js 16 · TypeScript · React

Compute-heavy C++ modules (astronomical ephemeris, chart maths, batch report generation)

AI Open-weight LLM inference, free-tier orchestration with automatic provider fallback

Data Postgres / Supabase, Row-Level Security

Realtime WebSockets for chat, presence and booking queues

Payments Razorpay (UPI · cards · wallets) with GST-compliant invoicing

Edge Cloudflare DNS, WAF, caching

The platform is **its own hosting and website surface** — the same deployment that serves users also serves your marketing site, consultant pages and SEO landing pages, which removes a second build and a second bill. We build primarily on **free and open tiers**; your only recurring third-party outlay at launch is **domain, hosting, Razorpay transaction charges and Cloudflare**. Infrastructure spend then scales with your real footfall and downloads — you pay for growth, not for idle capacity.

4 · GROWTH & MARKET ENTRY

SEO · AEO · GEO

- Structured data on every chart, service and consultant page; FAQ and definition blocks written for answer engines (Google AI Overview, ChatGPT, Perplexity, Gemini).
- `llms.txt`, XML + image sitemap, Core Web Vitals on a PWA baseline.
- Consultant profile pages as ranking assets — each expert becomes an indexed, searchable destination.

PAID & SOCIAL

- Google Ads setup, keyword and regional-language campaigns, conversion tracking.
- Social media optimisation and marketing calendar, creative and community management reporting.
- Monthly analytics review — traffic, sign-ups, booking conversion, revenue per visitor.

5 · COMMERCIALS

COMPONENT	WHAT IT COVERS	CHARGE
Platform build & hosting	Full PWA, prediction engine, consultant console, admin panel, payments and realtime modules — built, shipped, hosted and maintained; the deployment doubles as your website surface.	**Included in monthly fee**
Growth services	SEO + AEO + GEO, Google Ads, social media optimisation and marketing.	**Included in monthly fee**
Monthly service fee	Continuing development, support and growth retainer.	**₹40,000 / month**
Revenue participation	Share of platform gross revenue in consideration of the zero-cost build and shared-growth model.	**10% of revenue**
Third-party pass-through	Domain, hosting, Cloudflare and Razorpay charges — direct at actuals, no markup.	**At actuals**

Term: the ₹40,000 monthly fee continues while services continue, revised as footfall and scale grow. The **10% revenue share runs for the commercial life of the platform**, surviving termination of the retainer.

6 · MUTUAL UNDERSTANDING — TRANSPARENCY & TRUST

You receive

- Full project access to the source code and repository history.
- Written documentation of the security model: RLS, secrets handling, payment scope and role permissions.
- Direct access to hosting, domain and payment dashboards — nothing is held hostage.
- Named support channel and a monthly delivery and spend review.

We commit

- High-end engineering standards, tested releases and documented handover.
- No hidden licence costs, no proprietary lock-in, no undisclosed pass-through charges.
- Client data and user birth-data remain the client's property; confidential and never resold.
- Open-book reporting on infrastructure spend as footfall grows.

7 · TIMELINE TO LAUNCH

PHASE	WINDOW	MILESTONES
P0 · Discovery	Week 1	Signed acceptance, requirement freeze, chart-module list, consultant onboarding flow, brand and domain finalised.
P1 · Architecture	Weeks 2–3	Next.js + C++ core scaffold, open-source astrology API integration, database and security design, PWA shell.
P2 · Build	Weeks 4–5	Kundali, Dasha, Gochar, numerology · Siddhi AI concierge · consultant profiles, per-minute chat, bookings, Razorpay.
P3 · Hardening	Week 6	Payment reconciliation, load and security testing, SEO/AEO/GEO pages and structured data, Cloudflare edge.
P4 · Launch	**15–20 Dec 2026**	Production cut-over, consultant pilot cohort, Google Ads and social go-live, monitoring and hypercare.

8 · TERMS & ASSUMPTIONS

- **Ownership.** Code, content, user data and brand assets belong to Shri Pankaj Sharma Ji; Kalki Intelligence retains its pre-existing tooling and frameworks.
- **Confidentiality.** Mutual; birth details and payment data handled under the Digital Personal Data Protection Act, 2023 (India).
- **Compliance.** Astrology guidance is offered for advisory and entertainment purposes; the platform carries appropriate disclaimers and does not replace medical, legal or financial counsel.
- **Billing.** Monthly fee payable in advance against a GST invoice; revenue share reconciled monthly with a transparent report from platform analytics and Razorpay statements.
- **Scope change.** Major new modules are agreed in writing with their own timeline; they do not pause current delivery.
- **Service levels.** Critical defect response within 4 working hours during the retainer period; uptime monitored at the edge.
- **Termination.** Either party may exit the monthly retainer with 30 days' written notice; the 10% revenue share continues for the platform's commercial life as consideration for the zero-cost build.
- **Governing law.** Courts at Indore, Madhya Pradesh, India.

SERVICE COMMITMENTS DURING THE RETAINER

99.9% uptime target
Edge-monitored with alerting; incidents reported in the monthly review.

4 h critical response
Working-hour turnaround on blocking defects, payment issues and consultant outages.

HI + EN support
Named channel, Hindi and English, backed by the Indore team.

Monthly open book
Delivery, traffic, bookings, revenue and infrastructure spend in one report.

9 · ACCEPTANCE

By signing below, the parties accept this proposal — scope, commercials, timeline to a **15–20 December 2026** launch, and the transparency terms in section 6 — and authorise Kalki Intelligence to begin Phase P0 immediately on receipt of the countersigned copy.
